

Product Guides

twData

Mission: To capture and analyse data on all of the events which have taken place on the platform, including reason codes for delays & errors from all parties; Allows users to measure global performance of each party.

Central Point For Key Information

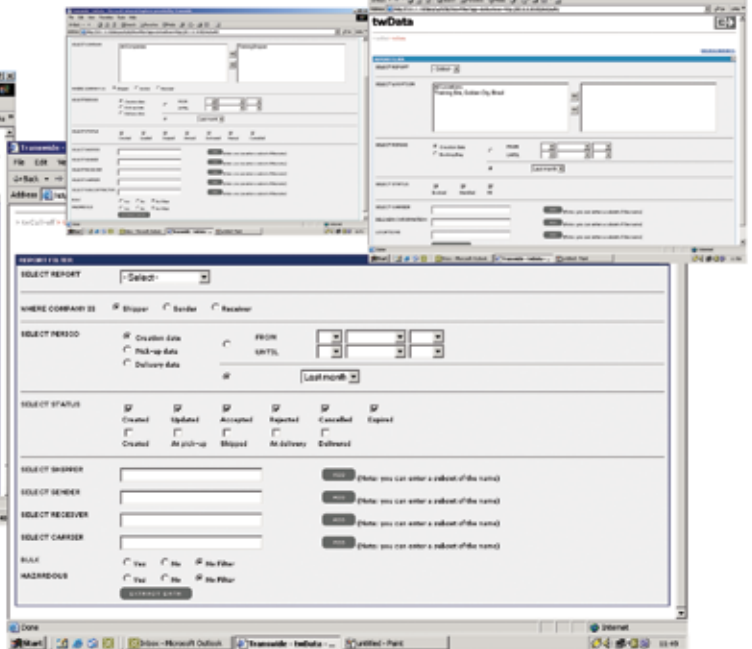

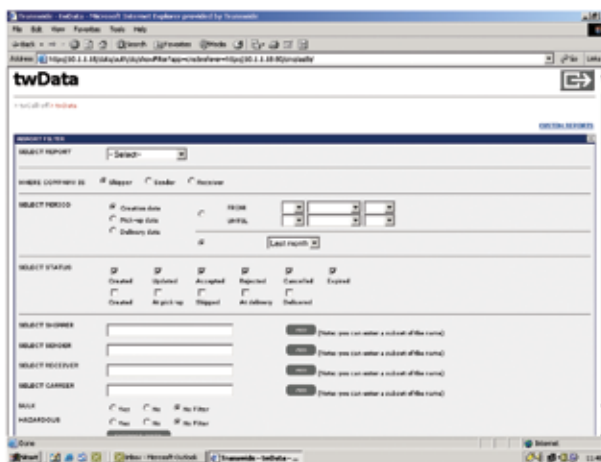

twData is an integrated, integral part of the Transwide platform that provides information that can be used to provide key performance indicators across twSlot, twDoc and twCall-Off. The reports that twData produces can be filtered to feature only desired field information on the whole logistic chain.

Neutral Information

The reports that twData produces are totally neutral, and are based on the updated information inputted by all parties during the logistic process. Because this data is based on hard, agreed upon fact it is essential for measuring performance and maintaining an agreed level of logistic service.

Features

- Central source of key performance information
- Source of information is neutral
- Customisable field extraction, for tailored reports
- Reports available from all Transwide solutions - twDoc, twCall-Off & twSlot
- Reports exported to .CSV format for direct integration with Excel & Microsoft Access
- Ideal source of information for resolving disputes over service levels
- Application currently available in English, French, Dutch, German, Italian & Spanish
- Customer service available in English, French, Dutch, German and Italian.
